

SUPPORT FOR THE AMENDMENT

Support for the amendment to claim 16 is found in claim 20 as previously presented.

No new matter would be added to this application by entry of this amendment.

Upon entry of this amendment, claims 16-18, and 25-29 will now be active in this application with claims 16-18, and 26 being under active consideration.

REQUEST FOR RECONSIDERATION

The claimed invention is directed to an organic light-emitting diode comprising a triazolopyrimidine derivative.

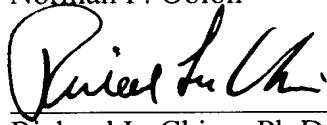

Claims 16-21 have been rejected under 35 U.S.C. 112 first paragraph, enablement.

Applicants wish to thank examiner Murray for indicating that the claims are enabled for a triazolopyrimidine where R<sup>1</sup> is an amine, halogen or OH group and where R<sup>2</sup> is an amino group. Applicants have now amended claim 16 to limit the definition where R<sup>1</sup> is an amine or halogen and where R<sup>2</sup> is an amino group. The (Het)Ar has been defined as a specifically substituted phenyl group. In view of applicants' amendment and indication that such subject matter was enabled, withdrawal of this ground of rejection is respectfully requested.

Applicants submit that this application is now in condition for allowance and early notification of such action is earnestly solicited.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.  
Norman F. Oblon
